Jennnifer Parker (Asset Officer)
Mercedes Neems (Executive Support Officer)

Briefing: Speed Management 2024-2027

This briefing was presented by the Group Manager Engineering Services, alongside the Asset Manager (Interim) and the Asset Officer. Council resolved on 1 August to adopt the Interim Speed Management Plan 2023. The next step is to consider a district wide speed management plan that cover a 10 year period from 1 July 2024 to 30 June 2034, with a fixed three year action plan from 2024-2027.

The purpose of this briefing was to:

1. Provide an overview of the Road to Zero and the setting of safe speed limits
2. Provide clarity on Councils requirements under the Land Transport Rule: Setting of Speed Limits 2022 and allow Councilors to ask questions.
3. Provide an overview of the engagement and consultation for the Interim Speed Management Plan.
4. Explain how the One Network Framework (tool to classify street categories) in conjunction with the Speed Management Guide are used to evaluate safe and appropriate speed limits
5. Demonstrate what a default application of the guide on a district scale would look like and opportunity to make adjustments in accordance with the guide.

6. Provide proposed principles, developed by officers from the engagement if the interim plan, to guide our thinking in developing the district wide Speed Management Plan for consultation with the community.
7. Provide ideas on what a 3-year implementation plan could look like, with indicative costing provided.

A report will be going to the ordinary council meeting on 12 September with options for public consultation on the draft 2024 Speed Management Plan document.
